# Safety Guidelines

As set out in the “Safety Guidelines for the Live Performance Industry in Ontario” York’s H&S policy stipulates that during set up/load-in and strike/load-out the theatre space is considered a Construction Site and must follow the regulations as stipulated by the Ontario Health and Safety Act (OH&SA). As such, everyone who enters a performance space during these times (both on stage and in the audience chamber) must be wearing appropriate Personal Protective Equipment (PPE), including CSA approved foot ware (i.e.-steel toes) and a CSA approved hard hat. There are no exceptions.

Between set up/load-in and strike/load-out, the theatre will revert to an Industrial Site (as defined by the OH&SA) and appropriate PPE must be used when hazards are present (i.e. hard hats must be worn when overhead work is being done). The Performance Facilities Lead technicians(s), *Coordinator, Technical Services OR Manager, Performance Facilities* will be responsible for deciding when the theatre changes between a Construction and Industrial site.

For further information about York's Health and Safety policies and in particular Performance Facilities Health and Safety policies please contact the *Manager, Performance Facilities* or the *Coordinator Technical Services*.

**NOTE:** Food and drinks are not permitted in the space, except bottled water.
